OBJECTIVE

Motivated Computer Science undergraduate with hands-on full-stack development experience, a strong interest in financial technology, and prior exposure to banking operations through a placement at People's Bank. Seeking a Software Development Internship at Alliance Finance Company PLC to apply skills in full-stack engineering, databases, and applied security to support the company's digital initiatives.

EDUCATION

BSc (Hons.) in Computer Science — Faculty of Science, University of Peradeniya *May 2022 – Present*
Specialization: Mathematics, Computer Science & Statistics

Primary & Secondary Education — Dharmasoka College, Ambalangoda *May 2006 – Dec 2020*

TECHNICAL SKILLS

- Languages: Java, Python, TypeScript, JavaScript, C/C++, SQL, PL/pgSQL
- Frameworks & Libraries: React, Spring Boot, Tailwind CSS, Vite, shadcn-ui, Node.js
- Databases: MySQL, PostgreSQL
- Security & Cryptography: ECDSA, ECIES, Shamir Secret Sharing, Post-Quantum Cryptography (CRYSTALS-Kyber, CRYSTALS-Dilithium)
- Data & ML: Jupyter Notebook, TensorFlow/Keras, VGG16, ResNet50, Transfer Learning
- Tools: Git/GitHub, Arduino, 3D CAD & Printing

WORK EXPERIENCE

DARAZ Headquarters — Governance Section *Oct 2023 – Dec 2023*

- Supported platform structure and consistency initiatives across Daraz's regional marketplaces.
- Played an active role in Category Tree Mapping for Daraz Bangladesh and Daraz Pakistan, ensuring standardized product classification and alignment.

People's Bank — Regional Office, Nugegoda *Jan 2021 – May 2021*

- Gained hands-on experience in the Account Opening Department, handling customer onboarding and ensuring compliance with banking regulations.

PROJECTS

ASL Finance Hub (Ongoing) — Financial Management Dashboard

TypeScript, React, PostgreSQL, PL/pgSQL

- Building a full-stack financial tracking and management system with database-driven analytics and reporting.

Secure E-Procurement System

Python, JavaScript, React, HTML, CSS

- Developed a production-grade cryptographic platform implementing advanced security protocols for government procurement workflows.
- Utilized ECDSA, ECIES, Shamir Secret Sharing, and hash-chain ledger verification to ensure secure transaction integrity and compliance.

Project Sportify — Sports Management System

React, Tailwind CSS, TypeScript, Spring Boot, MySQL, BCrypt

- Built a full-stack web application for sports management covering player profiles, facility bookings, live score tracking, and merchandise purchasing.
- Enabled players, sports organizations, and teams to streamline operations on a single platform.

Scalability Analysis of Hybrid Post-Quantum Authentication in Dense V2X Networks

Python, Post-Quantum Cryptography, CRYSTALS-Kyber, CRYSTALS-Dilithium, V2X Protocols

- Honours research project analysing the performance and scalability of hybrid classical/post-quantum authentication schemes in high-density vehicular networks.
- Evaluated latency, throughput, and authentication overhead across simulated dense V2X environments.

Sincerely Sri Lankan — Cultural Web Application

React, TypeScript, Vite, Tailwind CSS, shadcn-ui

- Built an interactive platform showcasing Sri Lankan culture and heritage with modern UI components.

Tea Leaf Disease Classifier

Python, Jupyter Notebook, VGG16, ResNet50, Transfer Learning

- Developed a deep learning classification system achieving 91.07% accuracy in identifying tea leaf diseases using pre-trained neural networks.

VOLUNTEER WORK & AFFILIATIONS

Developer — AIESEC in Sri Lanka

- Engineered and maintained national web platforms and digital initiatives to support organizational scalability and streamline data management.

AIESEC in University of Peradeniya

- Local Committee Vice President, Incoming Global Talent B2B & Value Delivery (Term 25.26) — leading strategic partnerships and cross-cultural exchange programs.
- Organizing Committee Vice President, Trailblazers 2024 — a flagship youth leadership conference for university students.

Volunteer — STEMUp Educational Foundation

- Conducted interactive sessions on programming and IoT to enhance digital literacy among children in rural communities.

EXTRA-CURRICULAR ACTIVITIES

- Team Member, Basketball Team — University of Peradeniya (2022–2025) and Dharmasoka College, Ambalangoda (2015–2019).
- Team Leader, Smart Medical Delivery Drone — designed an Arduino-based autonomous medical sample transport drone with real-time temperature control, environmental sensors, and GSM-based data transmission (Arduino, C++, 3D CAD/Printing).
